

QuikPath Overview

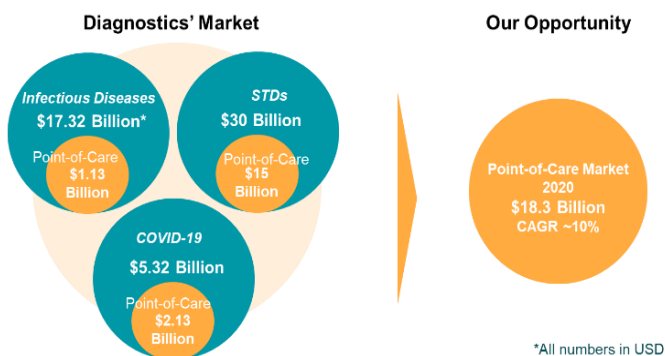

The Problem and Opportunity

Infectious disease testing is time consuming and expensive, requiring skilled professionals – often resulting in anxiety and delays in treatment.

Case in point: Covid-19. Six months after being declared a pandemic, **COVID-19 testing rates are only 19%** of that recommended by WHO. **Unmet demand is estimated to be 2.7B tests, growing at 17.6% Y-o-Y.**

At, QuikPath, our mission is to make diagnostics quicker, accessible, convenient and affordable – without compromising on sensitivity or specificity. Given the global; situation, our **first focus is Covid-19**

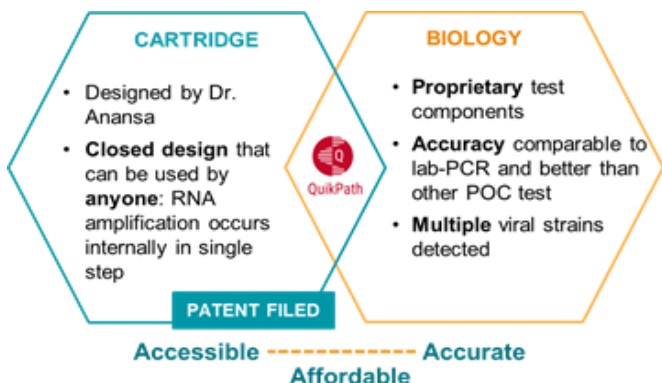

Our Solution

QuikPath’s **technology is based on LAMP RT-PCR**. It is easily **adaptable for a variety of diseases**. Applying it for COVID-19, we have developed a **Point-of-Care Test** that can be **performed by anyone anywhere** and gives **results < 40 mins**.

Our Innovation and Advantage

Patent pending design. Sensitivity of 10 viral load per ul

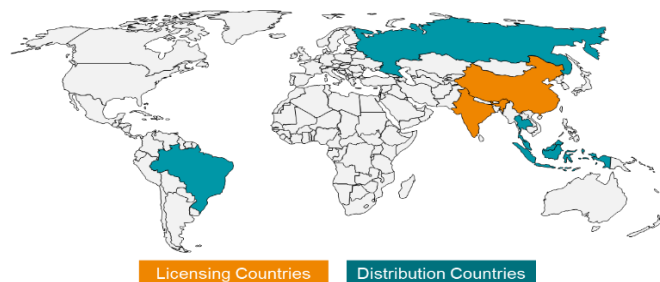

Our Products

QuikPath RAPID	QuikPath RAPID Self
Fluorescence detection	Colorimetric
< \$20 / test	< \$20 / test
10 tests / run	1 test / run
> 90% sensitivity	> 90% sensitivity

Two products, each comprising a patent pending cartridge (which contains a proprietary reagent mix to detect viral RNA) and an analyzer to serve as heat bath

Go-to-Market and Progress

- Provisional patent filed in Singapore and India
- Final stage of product review by the HSA, Singapore
- CE mark certification planned for Oct-Nov 2020
- Launch in in Nov 2020 in India, ASEAN and Brazil
- Distributor and OEM discussions in progress

The Road Ahead: Beyond COVID-19

In the future, we intend to **design and sell cartridges** to test for infectious diseases such as **Influenza (panel), TB, HIV, Dengue and STI’s** and cater to **F&B industry by developing test** for contamination in food and beverages. **All tests will be compatible with existing Analyzers.** **Network from COVID-19 would allow us to expand and scale operations efficiently.**
